PROFESSIONAL SUMMARY

Senior Flutter Engineer and Team Lead with 5+ years building and shipping high-performance cross-platform apps for iOS and Android — 15+ published to the App Store and Google Play. Strong in Dart, Clean Architecture, state management (Bloc, Cubit, Provider, GetX), the Firebase ecosystem, RESTful APIs, CI/CD, and unit/widget/integration testing, with a record of leading and mentoring engineers and using AI-assisted development to accelerate delivery.

TECHNICAL SKILLS

- Languages & Frameworks:** Dart, Flutter (Material & Cupertino)
- Architecture & Patterns:** Clean Architecture, MVVM, MVC, SOLID, Repository pattern, Dependency Injection, code generation (Freezed, json_serializable, build_runner)
- State Management:** Bloc, Cubit, Provider, GetX
- APIs & Data:** RESTful APIs, Dio, HTTP, JSON serialization, pagination & caching
- Firebase:** Authentication, Firestore, Realtime Database, Cloud Functions, Cloud Messaging (FCM / Push Notifications), Remote Config, Crashlytics, Analytics, Cloud Storage
- Native Integrations:** Google Maps & geolocation, QR/barcode scanning, deep linking, in-app payments & e-commerce checkout, camera & media
- Local Storage:** Hive, SQLite, Shared Preferences, Secure Storage, offline-first sync
- UI/UX & Motion:** responsive & adaptive layouts, custom widgets, theming & design systems, animations (Hero, AnimatedBuilder, implicit/explicit, custom), localization (i18n) & full RTL (AR/EN/IT), accessibility
- Testing & Quality:** Unit, Widget & Integration testing, Flutter DevTools profiling, Sentry, structured logging
- CI/CD & Release:** Fastlane, GitHub Actions, Firebase App Distribution, flavors/build variants, App Store & Google Play deployment
- AI-Assisted Engineering:** LLM coding assistants for code generation, refactoring, test-writing & review — used to raise quality, speed & consistency
- Tooling & Process:** Git (GitHub, GitLab), Postman, Figma, Firebase Console, Jira, Trello, Agile/Scrum, code review

PROFESSIONAL EXPERIENCE

Smart Vision — Flutter Team Lead · Full-Time · Egypt — serving clients across KSA, Kuwait & Egypt Jul 2025 – Present

- Lead the Flutter team for a software agency, owning end-to-end mobile architecture, code quality, and release management across multiple concurrent iOS and Android client products.
- Built, shipped, and maintained production apps to the App Store and Google Play across e-commerce, sports, fitness, and loyalty domains — La Carapellese, Hatrick, Mazaya, and FTTech Pro (see Published Apps).
- Set engineering standards for Clean Architecture, Bloc/Cubit state management, reusable component libraries, and CI/CD pipelines, and ran code reviews that kept releases stable, consistent, and on schedule.
- Integrated Firebase (Authentication, Firestore, Cloud Messaging, Crashlytics), RESTful APIs, payments, maps/geolocation, and multi-language RTL, then refactored and optimized legacy apps to improve stability and runtime performance.
- Mentored developers, led technical planning and estimation, and rolled out AI-assisted development across the team to raise code quality and accelerate delivery.

PureSoft — Mid-Level Flutter Developer · Part-Time · Remote Sep 2024 – May 2025

- Provided technical leadership across 5+ Flutter projects, defining architecture and coding standards and reviewing code for quality and maintainability.
- Mentored 3+ junior developers, reducing onboarding time by ~50% through pairing, documentation, and reusable templates.

Grand Community — Flutter Developer · Full-Time · Egypt Jan 2024 – Aug 2024

- Engineered a dual-application platform (user and influencer apps) on a shared, modular Flutter codebase, delivering smooth performance across iOS and Android.
- Optimized rendering, network layers, and state management for a stable, responsive cross-platform experience.

Fourth Pyramid — Junior Flutter Developer · Full-Time · Egypt Nov 2022 – Sep 2023

- Delivered multiple high-performance Flutter apps optimized for low-end Android devices.
- Sustained a crash-free rate above 99% using Firebase Crashlytics and proactive monitoring.
- Partnered with designers on UI/UX improvements that lifted customer satisfaction by 15%.

PureSoft — Flutter Development Intern · On-site May 2022 – Oct 2022

- Built features on production Flutter projects following mobile best practices; contributed to launching 2 apps to Google Play end-to-end.

Freelance Flutter Developer Feb 2021 – Present

- Designed, built, and delivered 10+ Flutter apps for businesses and individuals, publishing to Google Play, TestFlight, and the App Store.
- Implemented CI/CD pipelines that cut manual release effort by 35%, sustaining a 95% on-time delivery rate.

PUBLISHED APPS

La Carapellese — Italian-food e-commerce (delivery tracking, loyalty & wallet, EN/AR/IT with RTL)

- [App Store](#)
- [Google Play](#)

Hatrick — football talent-scouting platform (players, agents, scouts; video challenges)

- [App Store](#)
- [Google Play](#)

FTTech Pro — fitness & nutrition tracker for trainers and clients

- [App Store](#)
- [Google Play](#)

Mazaya — deals & loyalty app (QR redemption, location-based offers)

- [App Store](#)

Also published: Grand Community, Tamkeen, Al Mousa Family (App Store & Google Play) · Gomltak, Asjad (Google Play)

EDUCATION

B.Sc. in Management Information Systems — Nile Higher Institute Jun 2021

Graduation project: Flutter mobile application — Grade: Excellent
